EDUCATION

University of California, Davis
B.S. Computer Science | GPA: 3.59/4.0

Davis, CA
Graduated Jun 2026

EXPERIENCE

Gen AI + Full Stack Intern

Think Round

Aug 2026 – Present

San Francisco, CA (Remote)

- Built **macro-chatbot**, a local CLI tool that generates an original recipe from whatever ingredients are on hand and returns an exact calorie, protein, carb, and fat breakdown from a real nutrition lookup, closing the gap between recipe apps that assume you know what to cook and macro trackers that assume you know what you ate

Open Source Contributor

freeCodeCamp

Aug 2026

Remote

- Replaced regex-based test assertions with behavior-based tests in a JavaScript workshop, part of a broader curriculum-wide initiative to make grading more reliable for learners
- Rewrote ambiguous VS Code extension descriptions in freeCodeCamp's curriculum and corrected a misleading quiz question about the Error Lens extension

IT Intern

Hartnell College

Aug 2026 – Present

Salinas, CA

- Resolved **20+** IT tickets, including password resets, DUO MFA setup, account lockouts, and campus badge access, communicating with students by phone and Ebbot Chat while staying calm and clear with those who were frustrated or racing to get back into class before a deadline
- Triageed issues in real time, distinguishing what could be resolved directly from what needed escalation, and communicated technical details clearly to coworkers when handing off inactive-account, missing-student-ID, or badge-access issues
- Directed students to the right resource when a request fell outside IT's scope, reducing back-and-forth and getting them to the correct department faster

Software Engineer Intern

Monterey Peninsula College

Jun 2024 – Jul 2024

Monterey, CA

- Built a data visualization tool in Component Pascal (BlackBox Framework) parsing arbitrary CSVs into a linked-list structure, dynamically rendering histograms
- Designed a binning algorithm for multi-histogram rendering, mentored by an industry mentor at Applied Solar Energy

PROJECTS

Salon Menu | React, Vite, Tailwind CSS, JavaScript | Live Demo

Aug 2026 – Present

- **120+** unique visitors and counting. Redesigned from a three-level nav (categories, colors, zoom) into a single scrollable gallery of **25+** color cards, each independently pinch-zoomable, pannable, and rotatable right in place

Rate My Stuff | MERN, Express, MongoDB, Mongoose, TypeScript, Render | GitHub

Aug 2026

- Full-stack app with a RESTful API and full CRUD for ratings, comments, and images
- Responsive React/TypeScript frontend with React Router, deployed to Render with GitHub CI/CD

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Component Pascal, HTML/CSS

Frameworks & Libraries: React, React Router, Tailwind CSS, Framer Motion, Vite, react-zoom-pan-pinch, Node.js, Express

Databases: MongoDB, Mongoose

Tools & Platforms: Git, GitHub, Vercel, Vercel Web Analytics, Render, CI/CD, DUO MFA

Soft Skills: Communication, Active Listening, Patience, Problem-Solving, Time Management, Conflict Resolution, Customer Service, Teamwork, Adaptability, Attention to Detail
